

ONION

Botanical Name: Allium cepa

Common Name: Bulbus Allii Cepae , common onion , garden onion

Medicinal part: Root bulb

Description: The onion plant has a fan of hollow, bluish-green leaves and its bulb at the base of the plant begins to swell when a certain day-length is reached. In the autumn (or in spring, in the case of overwintering onions), the foliage dies down and the outer layers of the bulb become dry and brittle. The crop is harvested and dried and the onions are ready for use or storage.
