

BEES WAX

Botanical Name: Unrefined

Common Name: Cera alba, beeswax, natural wax, glazing agent

Medicinal part: Bees wax

Description: Beeswax (Cera alba) is a natural wax produced by honey bees of the genus *Apis*. The wax is formed into "scales" by eight wax-producing glands in the abdominal segments of worker bees, who discard it in or at the hive. The hive workers collect and use it to form cells for honey-storage and larval and pupal protection within the beehive.
