

CRYSTAL MALT

Botanical Name: Malt

Common Name: Caramel malt

Medicinal part: Seeds/grains

Description: Malt is germinated cereal grains that have been dried in a process known as "malting". The grains are made to germinate by soaking in water, and are then halted from germinating further by drying with hot air. Malting grains develops the enzymes required for modifying the grain's starches into various types of sugar, including the monosaccharide glucose, the disaccharide maltose, the trisaccharide maltotriose, and higher sugars called maltodextrines.
